SANTINIKETAN - THE VENUE OF 36th INCA INTERNATIONAL CONGRESS - 2016

Santiniketan (Abode of Peace) is the place where Visva-Bharati, now a Central University of national and international repute, was originally initiated by Rabindranath Tagore as an unique institution of learning. The immortal poet who viewed environment as a part of very existence of human civilization and always believed in sustainable ecological development. Located in Birbhum district of West Bengal, about 165 km from the city of Kolkata, Santiniketan can be reached by road / railways. The nearest International airport is Netaji Subhas Chandra Bose International Airport about 20 km from Howrah Railway Station connected by regular public transport services. There are two other railway stations in the city (i.e. Sealdah and Kolkata located very near to Howrah). For the delegates from north-eastern states, from New Jalpaiguri (NJP) station located in North Bengal a number of trains are available.

FOCAL THEME

For more than a decade, climate change as an issue has attracted the attention of the world influencing the decision making in various spheres of development. A number of green house gases have been identified, the phenomenal increase of whom is directly responsible for the rise of air temperature. With global warming, behaviour of various events has been adversely affected and climate change becomes so important that an Intergovernmental Panel on Climate Change (IPCC) came into functioning based on international consensus in addressing this controversial issue with a series of assessment reports. Cartography as a science of map making is gradually getting importance for analysis and management of climate change in recent years, particularly after the advancement of Digital Cartography.

Climate change affects all ecosystems e.g. agro-ecosystem, river ecosystem, marine ecosystem, forest and grassland ecosystem and consequently appears as severe threat to the life support systems. Cartography has a vital role to play in vulnerability assessment of various threats arising from changes of various elements of weather and climate in spatial context. It is not only essential to map the rising sea level but also to forecast the future by generating Digital Elevation Model (DEM) with the application of Geo-spatial Technology. Particularly in GIS domain, Cartography has in fact a lot of options in depicting the impacts of climate change.

Climate change is now considered as the greatest single threat faced by human society. Rise in sea level and consequent flooding of the lower areas are among the conspicuous outcomes resulting from temperature changes often referred to as global warning. Inundation of islands and lower coastal areas happen not only due to melting of polar ice caps but also because of thermal expansion of sea water at the surface level. A warmer climate also increases precipitation in various areas resulting in devastating floods. Population of coastal areas worldwide becomes the most affected from frequent storm surges. It seems almost impossible in future to save the islands like Maldives or low lying areas worldwide like Netherlands. Planned retreat is suggested as its mitigation which is a challenging task. Cartography is essential for sensitization of the stakeholders on advancement of sea and subsequent inundation scenario in order to strengthen the preparedness on rehabilitation and its execution.

It is noteworthy that greenhouse gas concentrations in the atmosphere which is blamed responsible for trapping the heat have been naturally rising and falling for billions of years. Equilibrium prevailed in this context as evident from the assumption of cold and warm periods in earth's history. Out of unending desire for enjoying better life, as the modern society is artificially increasing greenhouse gases emissions, the equilibrium is disturbed and the dynamics of world climate system is altered. The nightmare scenario arising out of its ill-effects throughout the world has increased the urge for making strategies to cope with climatic disasters. Cartography has already established itself as an integral part of the domain concerning the analysis and management of climate change by virtue of the skills acquired by Cartographers on digital mapping with the advancement of the subject.

There is however another side of climate change apart from its well-known detrimental effects. New opportunities arise in agricultural sector from temperature changes particularly in colder regions as well as in the field of industries with evolving green and energy efficient technologies. New horizons in the field of research have opened up consequently bringing more investment, employment and income which may be termed as the opportunity side of climate change. 36th INCA - 2016 is the platform to discuss on climate change aspect from the stand points of its analysis and management with reference to the valuable role of Geographers, Scientists and Cartographers, Administrators, Planners, decision and policy makers and the like.

SUB-THEMES

36th INCA International Congress will focus on several sub-themes-

- 1. CARTOGRAPHY FOR SPACESHIP EARTH
- 2. CONCEPTUALIZING MAPS AND APPLICATION OF GEO-SPATIAL APPROACH IN CLIMATE CHANGE STUDIES
- 3. EVOLUTION AND APPRECIATION OF ENERGY MANAGEMENT AND GREEN TECHNOLOGIES
- 4. MAPPING OF POLLUTION, POPULATION AND NATURAL RESOURCES
- 5. GEOMORPHOSITES, CLIMATE CHANGE AND VULNERABILITY
- 6. GEOHYDROLOGY, SOILS AND FLUVIAL DYNAMICS
- 7. CARTOGRAPHY FOR LAND DEGRADATION AND DESERTIFICATION
- 8. MOUNTAIN CARTOGRAPHY AND DEGLACIATION
- 9. MILITARY CARTOGRAPHY AND MITIGATING CHALLENGES
- **10. ENVIRONMENTAL POLITICS ON CLIMATE CHANGE**
- **11. AGRICULTURE AND CARTOGRAPHY**
- **12. CLIMATE CHANGE MANAGEMENT IN COASTAL AND URBAN INDUSTRIAL AREAS**
- **13. CHANGING RURAL AND URBAN GEOGRAPHY**
- 14. TOURISM INDUSTRY ISSUES AND CHALLENGES FROM CLIMATE CHANGE
- 15. DYNAMICS OF SOCIO-CULTURAL ENVIRONMENT ADOPTING CLIMATE CHANGE
- 16. CLIMATE CHANGE, SUSTAINABILITY ISSUES AND DEVELOPMENT PLANNING
- 17. GEO-SPATIAL TECHNOLOGY AND LARGE SCALE MAPPING
- **18. CARTOGRAPHY AND SCHOOL EDUCATION**
